Website   andreobrien.me

A full-stack developer with a passion for learning. Commercial experience using JavaScript, PHP and CSS. Also enjoys developing with frameworks such as React, Vue and Laravel.

SKILLS

FRONT-END
- Passionate about JavaScript
- Experience developing with JavaScript (including React, Vue and ES6)
- Commercial experience testing websites with JavaScript
- Experience with responsive CSS frameworks

BACKEND
- Has used PHP on several commercial websites including Zagga's lending platform, NZ Doctor and Pharmacy Today and managing projects with Git
- Some experience with ExpressJS, MySQL, cloud hosting and server configuration (Linux, Apache/Nginx)

WORK HISTORY

WEB DEVELOPER, COMMUNICA
Communica is a Drupal web agency developing medium-large sites (based in New Lynn, Auckland).
Oct 2017 – Mar 2018 (6 months)
- Wrote JavaScript-based tests for websites such as Zagga and NZ Doctor
- Developed an open-source API library
- Developed and tested modules and email templates in Drupal
- Wrote and fixed existing CSS on a variety of websites

FULL-STACK DEVELOPER, CREATIVE MONDAY
Creative Monday is a freelancing partnership I started with another student after completing my studies in web development.
Dec 2016 - September 2017 (10 months)
- Full-stack development based on October CMS and Laravel
- Testing, quality control and SEO

EDUCATION

DIPLOMA IN WEB DEVELOPMENT AND DESIGN (level 6)
Feb 2016 - Nov 2016
Vision College, Hamilton

BACHELOR OF MUSIC (level 7)
Feb 2010 - Jun 2014
Vision College, Hamilton

OPEN SOURCE PROJECTS

SKELETON-FLEXBOX and KUBE-FLEXBOX
These projects modernise existing CSS frameworks by replacing the traditional grid system with flexbox. Skeleton-flexbox also adds some additional improvements such as adding more classes for colours.

SIMPLE-GULP-SETUP
Simple-gulp-setup helps developers get started with Gulp by providing essential functionality (concatenating files, compiling ES2015 to ES5, compiling SASS/SCSS to CSS, auto-prefixing CSS for improved browser support, and minifying files).

DANCERACE-C3
A PHP library of wrapper functions for Dancerace C3's REST API to get client information.

INCLUDE-HTML
Include-html is a JavaScript tool that provides a quick and easy way to include one HTML file into another without requiring a back-end language.
